# FLUORIDE FILTER

Finally! Safe fluoride filtration!

Activated alumina is used in most fluoride filtration systems. Due to this, some fluoride filters can leave high levels of aluminum in your filtered water. The Santevia Fluoride Filter gets rid of fluoride without leaving residual aluminum as well as other contaminants while mineralizing and balancing water pH. The result: great tasting, safe, clean water with added minerals like calcium and magnesium as recommended by the

- ✓ Fluoride reduction
- ✓ Chlorine reduction
- ✓ Heavy metal reduction
- ✓ Improves taste and odour
- ✓ Alkalizes, reduces acidity
- ✓ Adds essential minerals
- ✓ Antioxidant
- ✓ Cost effective

# GET FLUORIDE OUT OF YOUR TAP WATER

## Risks of over-fluoridation in water

Brain damage

Arthritis

Hyperactivity and/or lethargy

Thyroid disease

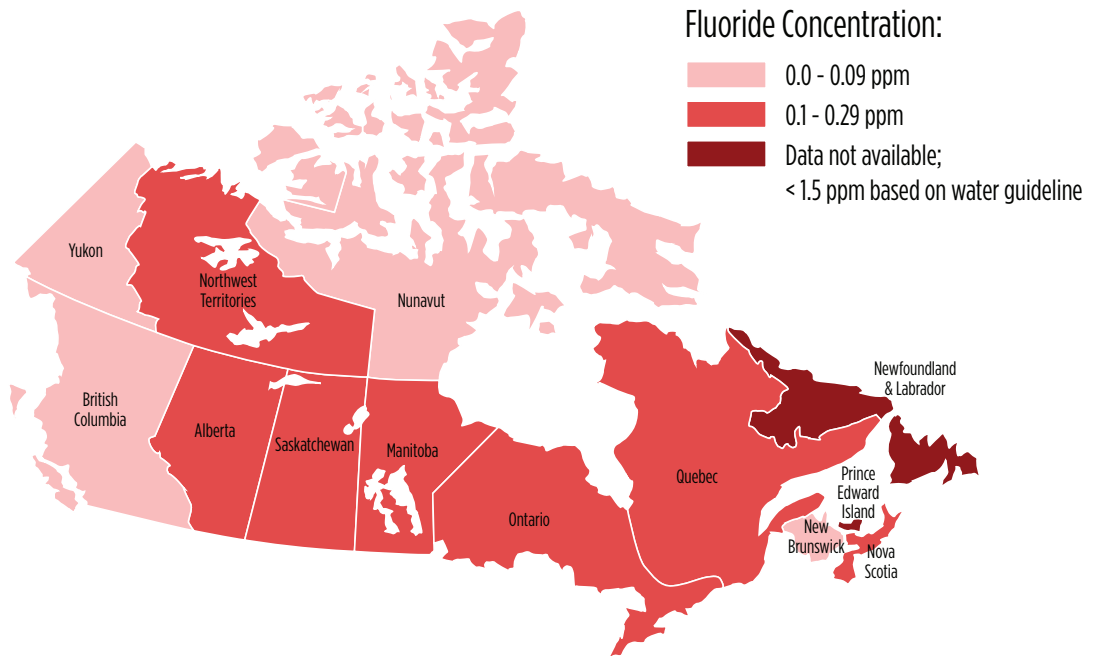

Muscle disorders

## Comparison between Santevia Fluoride Filter and Big Berkey PF2 Filter

Fluoride Filter Features	Santevia	Berkey
Fluoride reduction at: Start of life Mid-life	100% (✓) 97% (✓)	100% (✓) 75% (✗)
Aluminum residue level in finished water	0.0 ppm (✓)	5.9 ppm (✗)
Improves taste and odour	(✓)	(✓)
Alkaline	(✓)	(No claim)
Filtration rate (L / Hour)	1.6 (✓)	1.0 (✗)
Stated filter life Effective filter life	1200 L / 4 months 1200 L / 4 months	3,785 L / 1 year 830 L / 2.5 months
Average cost per L ( based on tested lifetime )	4 ¢ / L	10 ¢ / L

## Canadian fluoride concentration
